

The Quilters Quilter

Skeleton Swag Borders August 2014

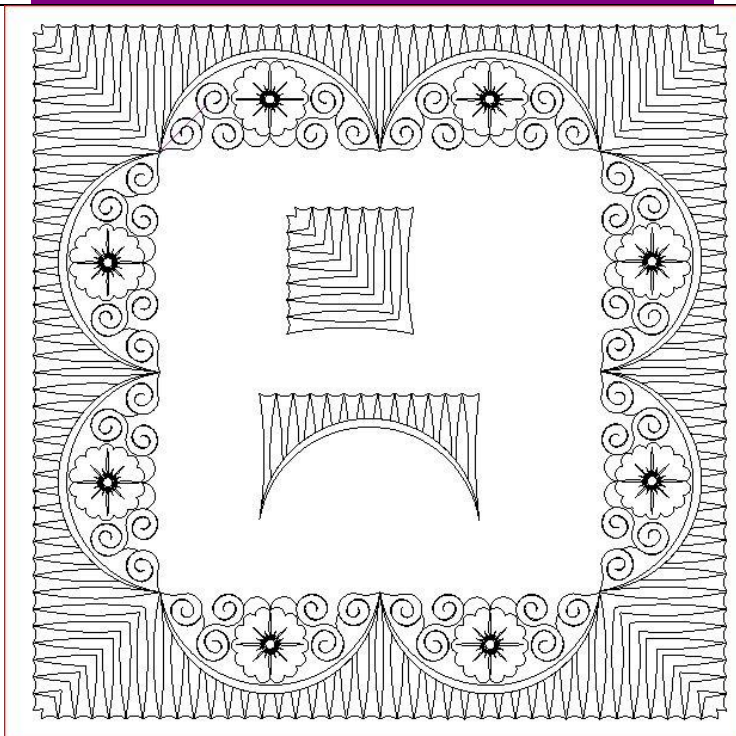

www.thequiltersquilter.com.au

I developed these patterns to help solve the problem of really wide and wonky borders. The Swag skeleton can be placed in a border with the piano keys overlapping the boundary . Use your fill function to trim them down to fit exactly into your border... The Idea is to purchase the Skeleton Patterns then you only need to purchase the fillers that suit the quilt you are working on. Or better still if there you need a specific one, just [email me](mailto:thequiltersquilter.com.au) and I will create it for you...

Patterns come with instructions

The Quilters Quilter

Skeleton Swag Borders August 2014

www.thequiltersquilter.com.au

Curved skeleton Border

To be used in conjunction with the skeleton Fills

these were designed for those who want to trim their borders back to match the curve of the scallop

Can be quilted with or without the corner fillers depending on how you want the finish to be....

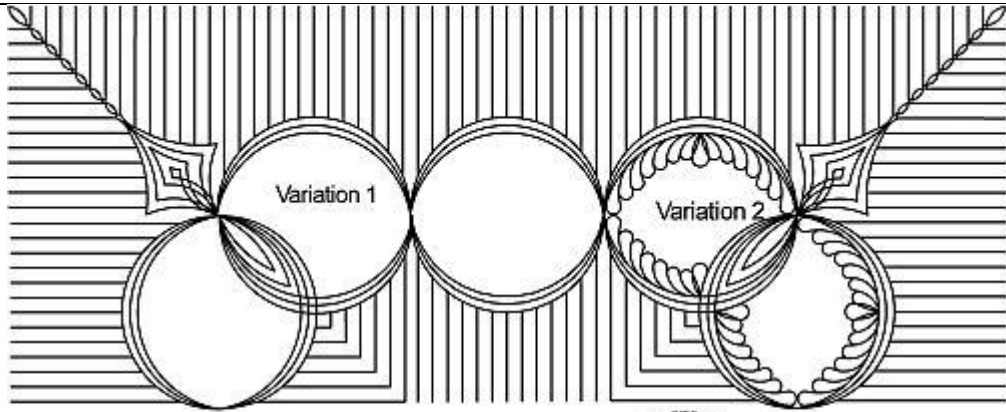

Border and corner are not meant to be quilted continuously.
Place the border scallops first then place the corners
Scallops are digitised at a height of 6"

* Fills are bought separately
